

Dimensions Are In Inches - Weights Are In Pounds

FLOWELL CORPORATION manufactures a complete line of differential pressure-producing venturies. They are built in accordance with ASME Fluid Meters and R.W. Miller Flow Measurement Engineering Handbook, Second Edition.

FLOWELL offers three types of venturies: the Lo-Loss Venturi, the Weld-In Venturi, and the Flanged Type Venturi. the standard construction materials are carbon steel or carbon steel with a stainless steel throat, and stainless steel.

Venturies are designed to operate with gases, liquids, slurries, and sludges.

All venturies are priced on design and beta ratio.
